

Vitamin A: Our Needs and Sources Location

Important for healthy eyes & skin, some excellent sources of VITAMIN A are:
Watermelon, cantaloupe, parsley, squash, spinach, tomatoes

Excellent Sources of Vitamin A

An easy way to judge the Vitamin A content of a food is its color. Orange and yellow fruits and vegetables and dark green leafy vegetables provide more Vitamin A than the lighter colored fruits and vegetables.

- Carrots Apricots
- Broccoli Nectarines
- Sweet Potatoes Peaches
- Yellow Squash Watermelon
- Cantaloupe Melon Pumpkin
- Tomatoes Liver
- Greens including: spinach, collard, fresh parsley, turnips, mustard.

Good Sources of Vitamin A

- Dried Prunes Green Peas
- Eggs Cheese
- Milk, Ice cream Romaine/green, leafy lettuce

Ideas to include more Vitamin A in your diet

- Eat raw carrots and broccoli with a yogurt based dip as a snack.
- Use chopped raw spinach with romaine or leaf lettuce in a tossed salad. Add shredded carrots and fresh tomatoes for added color and Vitamin A.
- Add tomato sauce or tomato puree to ground meat mixtures when making meatballs, meatloaf, patties.
- Make a shredded carrot and raisin salad. Moisten with mayonnaise mixed with vinegar or plain yogurt or milk.
- Add canned or fresh tomatoes to casserole dishes.
- Serve cottage cheese with fresh or canned peaches as a snack or as a salad.
