

GROUND WATER MONITORING FORM

Description of Project: _____

Location: _____

Legal Address: _____

Contact Person/Phone: _____

This form is intended for use as a tool for measurement of ground water monitoring only. Soil profiles of test holes and soils typing must also be submitted on this proposed project. The monitoring and accompanying graph must reflect the six weeks of highest ground water. In order to obtain the six high weeks, eight weeks to one year of weekly monitoring will be necessary depending on the location and site conditions found. **Ground water is to be measured from original grade on all test holes and not from a filled or finished grade.**

WEEK 6	Date Monitored _____	Test Hole _____ *Water Depth _____	Test Hole _____ *Water Depth _____	Test Hole _____ *Water Depth _____
